1. Claim 17 is objected to under 37 C.F.R. 1.75 because of the following:

In claim 17 lines 3 and 5, " said a node " should be changed to --- said node " .

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

3. Claim 7 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

The limitation recited in claim 7 is identical to the limitation recited in claim 6.

4. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5 line 5, " said set of slots" has no antecedent basis.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Forest et al. (2004/0081193) and Fuhrmann et al. (2003/0067873) are all cited to show systems which are considered pertinent to the claimed invention.

6. Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. Claim 17 would be allowable if rewritten to overcome the objection under 37 C.F.R. 1.75.

8. Claims 1-4,6,8-16,and 18-25 are allowed.
For claims 1-4,6,8-16, and 18-25, the prior art fails to teach a combination of a verifying procedure for subsequently verifying that information separately held by the nodes is not inconsistent regarding the nodes' right to allow sending of data in the slots and disabling the verifying procedure from producing a positive verification during transsition periods at which different nodes on the link risk having inconsistent link data.
